

HIMAX®

Digital Type

BT-10 BT-100

Precision torque measurement purposed digital torque meter with Bluetooth output and Android APP

The HIMAX torque meter is mainly used to accurately measure the output torque of small torque tools to manage the torque tools used on the production line to achieve consistent standard output values so as to improve production efficiency, lower the defect and build high quality and low waste economic benefit.

This product can be fitted to user's own managing according to different needs on different occasions such as to measure the support torque of the hinge of LCD panel of a notebook computer, the reset torque of the rear view mirror of a car, etc.

BT-10/ BT-100

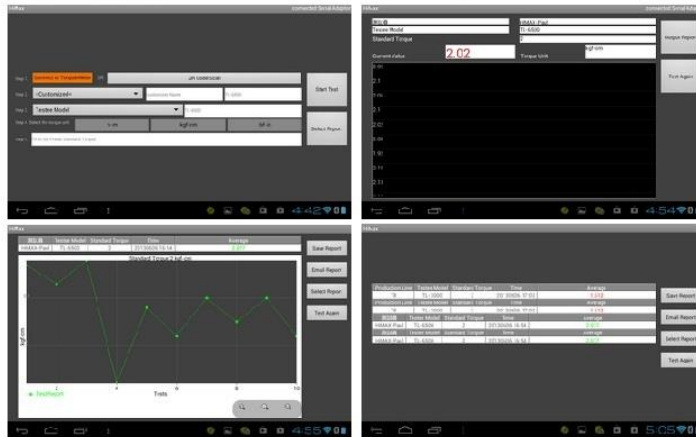

HIMAX torque meter is provided with auto reset function. It may improve work efficiency for repeat measurement on a same torque tool. Auto power off system may effectively prolong the operation time, convenient in carrying and use. Wireless data output via Bluetooth can facilitate the data application and analysis.

- Auto RESET
- AUTO POWER OFF
- Bluetooth data output interface
- Android analyzing APP

HIMAX BT Torque Meter Android APP

1. Wireless data output via Bluetooth
2. Automatically output the report for your torque measurements
3. Able to set customized parameters for the report
4. Able to save and email the reports
5. And more convenient features

Model	BT-10	BT-100
Measurement Range	0.01~10.00 Kgf-cm/ 0.01~9.0 Lbf-in	0.1~100.0 Kgf-cm/ 0.1~90.0 Lbf-in
Accuracy	0.5%(F.S.) 2.00Kgf-cm / 1 digit	0.5%(F.S.) 20.0Kgf-cm / 1 digit
Power	1.2V Nicd cell 6pcs.	
Recharging Time	Within 15 Hours	
Time for Continous Use at Full Charge	20 Hours	
Battery Life	Approx. 300 charges	
Dimension	210x115x50mm	
Weight	240x115x50(with antenna) 2.1kg
